EDUCATION

University of New South Wales, Sydney, Australia

Feb 2024 – Dec 2026

- Bachelor of Commerce (Finance and Business Analytics)
- Relevant Course Work: Quant Business Analytics, Programming for Data Analytics, International Business Finance, Behavioural Finance, Portfolio Management, Wealth Management.

PROFESSIONAL EXPERIENCE

TOTO Ltd., FP&A Intern

Nov 2025 – Feb 2026

- Delivered the data foundation for monthly management reporting, extracting and validating large volumes of cost centre data from SAP ERP across 2 cost centres.
- Prepared sections of the monthly reporting pack tracking operating expenditure against targets, supporting management review of cost performance.
- Supported the finance team through a full budgeting and forecasting cycle, and senior staff through end-of-financial-year reporting against close deadlines.
- Reviewed cost centre structures and standard costing data, identifying opportunities for improved resource allocation and operational efficiency.

Bank for Investment and Development of Vietnam (BIDV), Credit Analyst Intern

Jul 2024 – Sep 2024

- Reviewed financial profiles, collateral documentation and loan applications for 20+ business clients with exposures of AUD 300k–420k, spanning pharmaceuticals, retail and other commercial sectors.
- Distilled complex client financials into concise written credit summaries, giving senior analysts a decision-ready basis for approval and risk grading.
- Contributed to asset valuation reports across real estate and collateral-backed instruments, ensuring accuracy of the underlying security assessments.
- Partnered with senior analysts to evaluate asset performance and flag emerging credit risks.

PROJECTS

Wealth Management Case Study, Australian household retirement strategy

- Built an eight-sheet, 8,332-formula Excel model projecting 30 years of superannuation, mortgage and non-super assets, applying FY2026-27 tax brackets, the indexed concessional cap, Division 293 and preservation age rules with per-person cap checks in every projection year.
- Stress-tested four allocation strategies across 200 Monte Carlo paths, establishing that none met the 70% income replacement target and that a 0.70 percentage point fee reduction was worth \$200,907, more than any change in allocation.
- Distilled the modelling into a scaled statement of advice satisfying the client's pre-preservation-age liquidity constraint, published with the model to a public portfolio site.

FX Exposure and Hedging Case Study, Micron Technology (MU)

- Quantified Micron's operational currency exposure from its 10-K filings, mapping revenue and manufacturing footprint across Asian and US markets.
- Estimated USD FX exposure using CAPM and DXY-augmented regressions across 280 months of returns, isolating a currency beta of +1.184 from market beta.
- Designed an ICE US Dollar Index (DXY) futures hedge sized against a USD 1M equity position, modelling transaction costs across entry, exit and futures P&L.

Top 5, BISA x UNSW WIT x Capgemini Case Competition

- Built the credit assessment and processing model underpinning a Top 5 finish against a retail banking transformation brief.
- Owned the finance and cost section of the business case, modelling \$112k in weekly cost savings, and built the end-to-end front-end prototype.

CERTIFICATIONS

Goldman Sachs Internal Audit Job Simulation, Forage, Aug 2026. Standard Chartered Credit Analyst Job Simulation, Forage, Sep 2026. BCG Strategy Consulting Job Simulation, Forage.
