EDUCATION

University of New South Wales, Sydney, Australia

Feb 2024 – Present

- Bachelor of Commerce (Finance and Business Analytics)
- Relevant Course Work: International Business Finance, Behavioural Finance, Quant Business Analytics, Programming for Data Analytics, Portfolio Management, Wealth Management.

PROFESSIONAL EXPERIENCE

TOTO Ltd., FP&A Intern

Nov 2025 – Feb 2026

- Built and maintained budget and forecast schedule across 2 cost centres, extracting and validating source data from SAP ERP.
- Ran monthly actual versus budget variance analysis, isolating cost drivers behind material variances and writing the commentary that went to management.
- Prepared sections of the month reporting pack tracking operating expenditure against targets.
- Reviewed cost center structures and standard costing data to identify opportunities for improved resource allocation and operational efficiency.

Bank for Investment and Development of Vietnam (BIDV), Credit Analyst Intern

July 2024 – Sep 2024

- Analyzed 10+ client profiles (AUD 300k–420k exposure) producing the financial assessment supporting loan approval and risk grading.
- Contributed to the preparation of asset valuation reports across real estate and collateral-backed instruments, ensuring accuracy of underlying security assessments.
- Partnered with senior analysts to evaluate asset performance and identify emerging credit risks.
- Developed a strong working knowledge of lending structures, mortgage products, and credit risk frameworks applied within a commercial banking environment.

ACADEMIC PROJECT

Wealth Management Case Study, Australian household retirement strategy

- Built an eight-sheet Excel model projecting 30 years of superannuation, mortgage and non-super assets for a hypothetical household, applying FY2026-27 tax brackets, the indexed concessional cap, Division 293 and preservation age rules, with per-person contribution cap checks in every projection year.
- Compared four allocation strategies on equal pre-tax dollars and ran 200 Monte Carlo paths, finding that no strategy met the 70% income replacement target and that a 0.70 percentage point reduction in fund fees was worth \$200,907, more than any change in allocation.
- Wrote a scaled statement of advice recommending a weighted split that satisfied the client's pre-preservation-age liquidity constraint, and published the model and both write-ups to a portfolio site

Top 5 @ BISA x UNSW WIT x Capgemini Case Competition

- Built the credit assessment and processing model underpinning the team's solution to a retail banking transformation brief.
- Owned the finance and cost section of the business case and built the full end-to-end front-end prototype.

FX Exposure & Hedging Case Study — Micron Technology (MU)

- Estimated Micron Technology's USD FX exposure by running CAPM and DXY-augmented regressions on monthly returns from Aug 2001 to Dec 2024, isolating market beta from currency beta.
- Analyzed Micron's operational currency exposure through its 10-K filings, mapping revenue and manufacturing footprint across Asian and US markets to support the empirical findings.
- Designed a hedging strategy using ICE US Dollar Index (DXY) futures, sizing contracts against a USD 1M equity position and modelling transaction costs across entry, exit, and futures P&L.

AWARDS & CERTIFICATION

Certifications: Standard Chartered Credit Analyst Job Simulation, BCG Strategy Consulting Job Simulation, Goldman Sachs Internal Audit Job Simulation.

SKILLS AND INTERESTS

Language: IELTS (Score: 8.0) – Full English Professional Proficiency, Vietnamese (Native)

Skills:

- **Technical:** SQL, R, Tableau, Java, Excel, Python
- **Finance:** DCF, Comparable Company Analysis, Budgeting, Hedging, Behavioural Finance.
